Introduction

This Statistical Supplement contains the data used to create graphs in the Ministry of Education Annual Report for the period from July 1, 1988 through June 30, 1989. Additional tables reporting provincial and school district information are included.

The Annual Report is organized according to the three goals of education and the five attributes of the school system. The goals and attributes are discussed in detail in, and form the framework for, the Annual Report. The Annual Report also includes supplements which provide more detailed information or descriptions of processes. The organization of this Supplement reflects that structure.

Several of the tables are reports that are produced annually by the Ministry, and are based on data collected from school districts. This Supplement includes a list of all such reports.

United States	97	78	40	9	1

Note: Scores are expressed on a hypothetical scale that ranges from 0 to 1,000, with a mean of 500 and a standard deviation of 100. Five levels were defined (300, 400, 500, 600, 700) in terms of what students know or can do. For example, students achieving level 600 are able to understand measurement and geometry concepts and solve more complex problems.

Notes: WITHDRAWALS are students who cease to attend any public school in B.C. between Sept. 30 and June 30 of the same school year. Some of these students may have withdrawn to attend an independent school or a school outside the province. A student may also withdraw more than once in a school year, inflating the number reported. A student graduating in January is not included in the withdrawal count.

DROPOUTS are students who enrol in September and withdraw from any further schooling. Past reports from the Ministry may have used the terms dropouts and withdrawals interchangeably. The above definition of a withdrawal has not been applied consistently over time.

Comparisons between years MUST BE MADE WITH CAUTION. In some years, students who transferred to private schools or schools in other provinces were accounted for and the number shown more closely reflects a true dropout figure. Beginning in 1987/88, Containment Centres, Long Term Provincial Resource Programs and Short Term Provincial Resource Programs were not included in the calculations, though students in these programs may have been included in earlier years.

Earlier reports may have expressed withdrawals as a percentage of June rather than September enrolments.

A 1988/89 graduate is a student who has completed provincially prescribed graduation requirements as summarized in the Ministry Policy Circular of 87/08/20. Included in the graduation count are those who received transcripts though the Ministry's Transcript System at the end of the school year (July). Students who completed the Adult Secondary Program (requirements established by the Ministry) are included. Students who completed graduation requirements by correspondence and are not registered in a public school are NOT included in the Transcript System. In previous years, graduates were those that completed equivalent requirements.

Students completing graduation requirements other than at the end of the school year (i.e.January graduates or those completing requirements through summer school or by writing August examinations) may not necessarily be included. The reason for this is that schools are responsible for producing transcripts except for the one occasion in July when the Ministry produces the transcripts. A school may report to the Ministry the number of transcripts which the school has issued but not all schools follow this practice. Transcripts reported by the schools are included in the Ministry statistics.

During the summer the Ministry continues to update the Transcript System as additional information is received from schools. In the fall, the records are placed in archives prior to the start of processing graduates from the next school year. Therefore, the number of graduates may vary with the report date. The 1988/89 graduates are reported as of October 12, 1989.

Note: Full-time equivalent (FTE) is a measure of the portion of time an educator is employed as a portion of a school year.

Until September 1983 board office educators included district-wide instructors and district-wide supervisory staff. Since September 1984 board office educators have included all educators reported in Function 4 (District Administration and Instructional Support Services). This includes all educators defined as types one through seven (i.e. Directors or Supervisors of Instruction, Teacher Consultants, Coordinators, Helping Teachers, Other Instructional Support or Professional Staff-Teachers). It may be that the change in definition influenced the reported numbers more than staff reassignments.

Since September 1984, teachers have included regular classroom teachers as well as department heads and regular teachers and administrators.

PART B: DATA LIMITATIONS

Please note the following information before making any comparisons between school years with regard to withdrawals (dropouts) or graduates.

Definitions:

Dropouts are students who are enrolled in September and withdraw from any further schooling.

Withdrawals are students who ceased to attend any public school in B.C. between September 30 and June 30 of the same school year. It is probable that some of these students may have attended a private school or a school outside the province. Withdrawals exclude January graduates. Currently the Ministry collects withdrawals.

Past reports from the Ministry may have used the terms "dropout" and "withdrawal" interchangeably and might not have been referring to the same thing.

Figures on Reports 1572 A and B should be used with caution in any comparison with previous school years. In some previous years, students who transferred to private schools or schools in other provinces were accounted for and the Ministry was reporting a true dropout figure. From 1965/66 to 1983/84, withdrawals may have been expressed as a percentage of June enrolments. Beginning in 1984/85, the withdrawal percentage is based on September enrolments. This has only minimal impact.

Graduate (1985/86 - 1986/87) is a student who has completed provincially prescribed graduation requirements as summarized in the Ministry Policy Circular 40 of 87/08/20. Students included in the graduation count are those who received transcripts through the Ministry's Transcript System at the end of the school year (July).

Students who completed the Adult Secondary School Program (requirements established by the Ministry) are included.

Students who completed graduation requirements by correspondence and are not registered in a public school are excluded from the Transcript System.

Students completing graduation requirements other than at the end for the school year (i.e., January graduates or those completing requirements through summer school or by writing August examinations) are not necessarily included. The reason for this is that schools are responsible for producing transcripts except for the one occasion in July when the Ministry produces the transcripts. A school may report to the Ministry the number of transcripts which the school has issued, but not all schools follow this practice. Transcripts reported by the schools are included in the Ministry statistics.

During the summer, the Ministry continues to update the Transcript System as additional information is received from the schools. In the fall, the records are placed in archives prior to the start of processing graduates from the next school year. Therefore, the number of graduates may vary with the report date.

Please note the following:

Prior to 1969/70 - only June grads were included.
1968/69 - 1973/74 - Correspondence graduates were included.

Sources of Grad Statistics

1964/65 - 1967/68	Computer and manual records from the Registrar's Office, Form E21, Examination and Correspondence Branches.
1968	Form E21.
1969-70 - 1973/74	Registrar's Office Computer Output (Academic/Technical) and Form E21 (Non-Academic/Technical).
1974/75 - 1983/84	Form E21.
1984/85	Phone Survey conducted by Systems Services Branch.
1985/86 - Current	Ministry of Education Electronic Transcript System.
Grads as a Percentage of Enrolment	In some earlier reports, particularly from 1951/52 to 1982/83, the graduation rates were based on June enrolment.

Historical Graduation Statistics are Believed to Include:

1966/67 - 1972/73	Academic/Technical, Commercial, Community Services, Industrial, Visual and Performing Arts.
1973/74 - 1979/80	Selected Studies (Arts, and Science, Commercial, Industrial, Community Services, VPA and Other) and Combined Studies.
1980/81 - Current	All students who had completed the Ministry of Education requirements for graduation included January Grads. Those who had completed the requirements at summer school prior to the new school year are not necessarily included.
